Mitsubishi A6M Zero James D'Angina,2016-10-20 Unquestionably the most iconic Japanese fighter of World War II, the Mitsubishi A6M Rei-Sen, Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war. Facing off against the likes of the Wildcat, Corsair and even the Spitfire, the Zero gained a legendary reputation amongst Allied pilots due to its incredible manoeuvrability. Detailed analysis of its technical qualities show why the Zero was so feared, but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it. A selection of historical photographs and unique artwork accompany the analysis as James D'Angina delves into the history of the premier Axis fighter of the Pacific Theatre, exploring the design and combat effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it.

Jet Fighters Jim Winchester,2011-12-15 Presents illustrations, historical notes, facts, and specifications for jet fighters, ranging from the earliest designs of the mid twentieth century to some of the most modern fighters in use today.

Troubled Partnership Mark A. Lorell,1996-01-01 During World War II, Japanese fighters, such as the famed Zero, were among the most respected and feared combat aircraft in the world. But for decades following the defeat of Japan in 1945, a variety of political and economic factors prevented Japan from developing its own modern national fighter. This changed in the 1980s. Japan began independently developing its first world-class fighter since World War II. After several years of contentious negotiations, the Japanese agreed to work with the United States to cooperatively develop a minimally modified F-16, the FS-X. The new fighter, however, has evolved into a world-class aircraft developed largely by Japanese industry primarily due to errors committed by the U.S. side. By the fall of 1995, fifty years after the end of World War II, the Zero for the 1990s will have made its first flight, catapulting Japan into the elite ranks of nations capable of developing the most advanced weapon systems. In *Troubled Partnership*, Mark Lorell traces the evolution of the FS-X, disclosing the conflicting economic and security objectives advanced by U.S. officials, the flawed U.S. policy of technology reciprocity, and the challenges of international collaboration. Its deep intimacy with the interplay of policy and economy will make this volume of

intense interest to political scientists, military studies specialists, historians, and government officials.

Overthrow David Poyer,2019-12-03 The United States and their Allied forces struggle to survive world war with China in this compelling, realistic thriller, the next in the Dan Lenson series. World War III continues in Overthrow, the next novel in the acclaimed series featuring Admiral Dan Lenson as the Allies converge against China, North Korea, and Iran in an explosive series of events. Admiral Lenson leads Operation Rupture, the invasion of South China, in a bid to finally end the war and restore peace. Meanwhile, Captain Cheryl Staurulakis fights to take a radical new "super ship" to sea, though its power and capability may introduce more risk than reward. In Washington, Dan's wife Blair conducts secret negotiations with a rebellious faction in Beijing, hoping to bring an end to the war, but her plans may be foiled by those who want outright revenge on China, not peace with them. In western China, Teddy Oberg's guerrilla band grows into a major insurgency, and the former SEAL master chief embraces his new role as an Islamic resistance leader. Sergeant Hector Ramos raises the flag of freedom in Taiwan while fighting his own personal demons, and in Seattle Dan's daughter, Nan Lenson, fights to save the world from a dangerous new epidemic. But as the Allies plot an endgame to the war, the complicated dance of global

warfare, on land and at sea, will finally trigger the nuclear Armageddon the entire world has feared for nearly a century.

The Authentication of Rembrandt's Titus F 1655 James R. Garcia,2010-09 James R. Garcia was born and raised in Rocky Ford, Colorado. Went to High School and then went into the Marine Corps, for four (4) years. I spent a large portion of my life working as a Manager of Purchasing and Subcontracts for a number of Major Subcontractors in the United States. Such as Bechtel Corporation, Fluor Corporation, Rockwell International Corporation, The Boeing Company, and Ball Aerospace Corporation. I retired in 1999. Upon retiring and during my working career I was always buying selling and studying art and started and owned an Art Gallery in Kennewick, Washington, known as Garcia's Americana Art Gallery. I sold and studied the art of Edward S. Curtis, Carl Moon and Western Art in General. I showed and attended the Major Art Shows all over the Southwest. I have lectured at Galleries and Museums, in Colorado mostly on Edward S. Curtis and Carl Moon Photographs. I have also testified in Court on the collections of Curtis and Carl Moon on the authentication of many of their works of photography. The work and study of authenticating a piece of art is a most satisfying effort and hopefully there will be people in the study of art and becoming an artist, that will be able to put their efforts and study in the direction of authenticating art. I hope that my story, The Authentication of Rembrandt's Titus F 1655, will help students to look into other avenues to follow in the field of art. James R. Shifting Power in Asia-Pacific? Enrico Fels,2016-11-03 This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power

shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

Aviation Law: Cases, Laws and Related Sources Paul B. Larsen, Joseph Sweeney, John Gillick, 2012-06-07 The flying public, airlines, and governments will all agree on one date that changed commercial flying: that was September 11, 2001. The first edition of Aviation Law: Cases, Laws and Related Sources, described early consequences of that event, particularly compensation of victims and early tightening of aviation security. Subsequently laws and regulations affecting all aspects of aviation changed so rapidly that it became difficult to set a cut-off date for the second edition. The rapid flow of events made an update urgent. Several gaps in the materials of the first edition became evident as the book was used. The authors filled those gaps, pruned old materials and added much new material describing not only the later developments, but also evolving economics and flight technology. The objective of the case book is to offer a basic handbook for air law practitioners providing them with a starting point for almost any subject they may encounter. For example, a lawyer specializing in liability law will quickly be able to find basic materials on the International Civil Aviation Organization (ICAO), air carrier licensing, FAA certification, and labor law. The book continues to present aviation law from the American point of view. Thus the book will be valuable for foreign air lawyers who are guiding foreign airlines in service to the very important North American pool of air traffic. The book also explains the international scene to American air lawyers so that they may guide their clients who provide foreign service. New chapters on liability for cargo damage and for ground damages have been added and new materials on the legal rights of lessors, successors, actual carriers and code-shares. A chapter on environmental regulation of aviation noise and emissions is also new. All the main subjects listed in the first edition are significantly updated. The three

authors are veteran transportation lawyers and continue their activities in this field.
